

Year 10

Option Course Selection

Mainstream & Maritime

2027

Rockingham

SENIOR HIGH SCHOOL

Dear Parents/Guardians,

At Rockingham SHS students in Year 10 study a range of compulsory subjects, including English, Mathematics, Science, Humanities and Social Sciences (HASS), Physical Education, and Health Education. Maritime students will do a

In addition, students can select option subjects that reflect their interests, strengths, and career aspirations. This guide outlines the range of option subjects available in, The Arts, Languages and Technologies Learning Areas for 2027. All Year 10 option courses will run for the full year, allowing students to develop a deeper understanding of their chosen subjects and better prepare for senior secondary studies in Years 11 and 12.

We encourage families to discuss the available options together and carefully consider selections. While every effort will be made to place students into their preferred courses, placements are subject to class availability.

Choosing subjects that align with a student's interests and goals can help make Year 10 a rewarding and successful experience.

- Students **must** select at least one subject from The Arts learning area and at least one subject from Technologies for the year.
- Students in the Maritime Program will also participate in a Maritime option class for two periods per week.
- Subject selections should be made carefully, as changes may not be possible once classes have been formed. We encourage students and families to consider each course's suitability, interests, future pathways, and associated costs before making their final choices.

Selections must be finalised by 16 October 2026. Students who have not submitted their selections by this date will be allocated subjects at the discretion of the school.

Please note: Some option courses have associated compulsory charges. Participation in an extra-cost option is conditional upon payment of a confirmation deposit equal to **50% of the total estimated course cost** payable by 30th October 2026. All subject charges for Year 10 courses should be paid in full by the end of Term 2 2027.

Payment plans are available for all families. Please contact the accounts office on 9527 0300 or email rockingham.shs.accounts@education.wa.edu.au to arrange a payment plan.

THE ARTS

Dance (10DAN)

Year 10 Dance provides students with opportunities to extend their performance, choreographic, and analytical skills through practical and engaging learning experiences. Students participate in technique classes, rehearsals, and collaborative tasks that build confidence, safe dance practices, and performance quality. They refine key elements of dance such as body, space, time, dynamics, and relationships while developing clarity, projection, and precision in their movement.

Students explore a range of dance styles—from contemporary to cultural forms—investigating choreographic intent, stylistic features, and the social, cultural, and historical influences that shape dance. They analyse professional works and apply choreographic devices and structures to create original pieces that communicate meaning and evoke audience response.

This course is ideal for students who enjoy performing, creating choreography, and working collaboratively in a supportive and creative environment. It also provides a strong foundation for students wishing to continue into Year 11 Dance in Senior School.

Please note that students enrolled in the Maritime Program will not be able to select this course.

Compulsory Charge: $64.00

Drama (10DRA)

Year 10 Drama provides students with opportunities to further develop their performance and creative skills through practical, engaging activities. Students participate in both individual and group work, building confidence and extending key dramatic techniques such as voice, movement, improvisation, characterisation, and play building.

As a performance-based subject, students will present work to an audience and learn the importance of collaboration, communication, and teamwork. A strong emphasis is placed on creativity, problem-solving, and working effectively with others.

This course allows students to specialise in areas such as dramatic action, script development, and exploring a range of theatre styles. It is ideal for students who enjoy performing, expressing ideas through drama, and working collaboratively to create interesting and dynamic characters. Drama in Year 10 also provides a strong foundation for students wishing to continue into Year 11 Drama.

Compulsory Charge: $NIL

THE ARTS

Fine Arts (10FAR)

Year 10 Fine Arts focuses on building strong practical skills and confidence as an artist. Students work with a variety of materials and processes, including pencil and ink drawing, dry-point etching, acrylic painting, and mixed-media techniques. They develop ideas that express personal beliefs and values, with a focus on representation and meaning, culminating in a resolved artwork that showcases their creativity and technical development.

Students also explore the work of established artists and art movements, discovering how and why artists create their work. These investigations help inspire students' own art-making and deepen their understanding of artistic intention. Fine Arts provides a solid foundation for students wishing to continue into Year 11 Visual Arts in Senior School.

Compulsory Charge: $80.00

Visual Arts (10VAR)

Year 10 Visual Arts allows students to explore and develop their creativity through a wide range of two-dimensional and three-dimensional art forms. They work with mediums such as drawing, painting, printmaking, sculpture, clay, collage, design, and digital or multimedia processes while building practical skills, creative thinking, and an understanding of the elements and principles of art and design. Students also investigate art history and study artists from different cultures and time periods, learning how to analyse and interpret artworks with confidence.

The course places strong emphasis on developing foundational skills and artistic expression, helping students grow as creative thinkers and makers. It is ideal for students who enjoy experimenting with new ideas and materials, exploring personal meaning in their work, and producing unique and thoughtful artworks. Year 10 Visual Arts also provides an excellent pathway for further study in **Visual Arts**.

Compulsory Charge: $80.00

THE ARTS

Performing Arts (10PA)

Year 10 Performing Arts introduces students to Dance, Drama, and Musical Theatre through a diverse range of creative and performance-based experiences. Students learn to create, present, and analyse performance work while exploring choreographic processes, dramatic techniques, and musical theatre conventions. The course encourages creativity, risk-taking, collaboration, and confidence, with opportunities to refine ideas and perform for a live audience. Throughout the year, students build transferable skills such as critical and creative thinking, empathy, communication, and teamwork.

This program provides a strong foundation for students wishing to continue into Senior School subjects including **Dance**, **Drama**, and **Music**. It is a supportive and engaging course designed to extend performance skills, nurture creativity, and help students feel confident presenting in front of others.

Compulsory Charge: $45.00

Media Arts (10MPA)

Year 10 Media Arts is a practical and creative course for students interested in filmmaking, photography, and visual storytelling. It builds key skills in cinematography, character development, and media production, providing a strong foundation for Year 11 Media Production and Analysis.

Students create a range of media works, including an original short film, trailers, posters, video reviews, and photographic art. They study film as an art form through Auteur Film and Film Noir, exploring directors such as Wes Anderson and Christopher Nolan. Photography is a major focus, with students
using DSLR cameras in manual mode to control aperture and shutter speed. Collaboration is essential, and students are expected to complete some production tasks outside school hours.

By the end of the course, students will have produced a digital photography portfolio and a collection of media works suitable for showcasing at events such as the YOH Screen Fest. These works support future pathways in Creative Arts, including portfolio entry into courses at ECU, Curtin, and Murdoch University.

Please note that students enrolled in the Maritime Program will not be able to select this course.

Compulsory Charge: $70.00

THE ARTS

Music (10MUS)

Year 10 Music is designed for students of all experience levels, from beginners through to advanced musicians, and is ideal for anyone with a passion for music. The course focuses on practical, hands-on learning using real instruments and real songs, giving students the chance to develop their skills in an engaging and supportive environment.

Students explore the elements of contemporary music while building skills on a range of instruments, including keyboards, guitars, ukuleles, and more. Vocalists also have opportunities to extend their performance abilities. Throughout the course, students learn to emulate the sounds they hear on the radio and use music technology to arrange, record, and produce their own musical ideas.

Compulsory Charge: $30.00

Photography (10PHO)

Year 10 Photography is a practical and engaging course designed for students who want to develop their technical skills, artistic eye, and confidence behind the camera. It introduces students to the creative possibilities of digital photography while encouraging personal expression and visual communication.

Students work with DSLR cameras and digital editing software to explore a range of photographic styles, including macro, portrait, landscape, action, and creative photography. They learn how to use composition, lighting, perspective, and camera settings to produce high-quality images, while developing skills in planning, capturing, editing, and presenting their work. Students also investigate the work of professional photographers, analysing how images influence audiences and how meaning is created through visual choices.

Throughout the course, students build a portfolio of photographic work that reflects their skills, creativity, and personal interests. They may have opportunities to participate in excursions and real-world photographic experiences, helping them apply their learning in authentic contexts. Year 10 Photography provides a strong foundation for future pathways in Visual Arts, Photography, TAFE, and university studies.

Compulsory Charge: $100.00

TECHNOLOGIES

Metalwork (10MTDM)

Metalwork provides students with the opportunity to further develop their practical workshop skills while working with a range of metals, tools, and equipment. Students will learn increasingly advanced fabrication techniques and gain experience in planning, designing, and producing quality metal projects.

Throughout the course, students will develop skills in sheet metal fabrication, metal shaping, and welding processes. They will learn to safely use a variety of workshop equipment, including drill presses, metal benders, cold saws, and oxy-acetylene equipment for heating, bending, and shaping metal. Students will also gain experience in MIG and fusion welding techniques.

By completing a range of practical projects, students will build confidence, accuracy, and problem-solving skills while developing the knowledge and techniques required for more complex metalwork projects. This course is ideal for students interested in engineering, trades, manufacturing, or hands-on learning.

Compulsory Charge: $80.00

Woodwork (10MTDW)

Year 10 Woodwork is a practical and hands-on course for students who enjoy designing, building, and creating high-quality projects. The course focuses on developing confidence and skill in the workshop, allowing students to plan and construct more complex pieces, including small items of furniture. It is ideal for students who enjoy working with tools, solving problems, and bringing their design ideas to life.

Students are introduced to a wider range of power tools, machinery, joinery methods, and fabrication techniques. They learn how to sketch ideas, create working drawings, and prepare procedure plans to ensure their workshop time is productive and purposeful. Occupational Health and Safety is covered comprehensively, helping students understand hazards, work safely, and develop responsible workshop practices.

Throughout the course, students build the competence needed to manufacture substantial projects to a commercial standard. Year 10 Woodwork also provides the essential skills and knowledge required for Year 11 Materials, Design & Technology: Woodwork and Metalwork, supporting students who wish to continue into Senior School pathways.

Compulsory Charge: $50.00

TECHNOLOGIES

Engineering (10ENDT)

Year 10 Engineering is a hands-on, project-based course that encourages students to become creative problem-solvers and innovative thinkers. Students apply engineering principles and systems thinking to design, build, and test practical solutions to real-world challenges, exploring how materials, structures, and physical forces interact to create efficient and purposeful outcomes.

Throughout the course, students work on major projects such as designing and constructing a Marble Run Machine that demonstrates mechanical systems and energy transfer, and developing a Solar Tracker/Charger that applies renewable energy principles. They plan, develop, test, and refine their designs using an iterative process, while considering important factors such as time, cost, risk, sustainability, and functionality. Collaboration is a key component, with students working in teams to complete production tasks and solve engineering problems.

By engaging in research, planning, prototyping, and evaluation, students build valuable skills in critical thinking, teamwork, communication, and project management. Year 10 Engineering provides a strong foundation for future pathways in engineering, technology, robotics, and STEM-related careers, preparing students for Senior School study and real-world applications.

Compulsory Charge: $155.00

Digital Technologies (10DIGI)

Digital Technologies is an exciting and practical course that introduces students to the world of programming, game development, robotics, and digital design. Students will explore how technology is used to solve problems, create innovative products, and shape the modern world.

Throughout the course, students will develop skills in coding, computer game design, graphic design, and 3D modelling. They will have opportunities to design and create 3D printed products, develop computer games, and work with robotics by programming, controlling, and testing robotic systems. Students will also investigate emerging technologies and explore potential pathways in STEM-related industries and careers.

Students will work both independently and collaboratively to research, design, create, and evaluate a range of digital projects. By applying the Technology Process, they will develop valuable 21st-century skills, including creativity, critical thinking, problem-solving, communication, and teamwork, while producing innovative digital solutions.

Compulsory Charge: $NIL

TECHNOLOGIES

Food Specialty (10FSP)

Year 10 Food Specialty is for motivated young food creators ready to elevate their skills and tackle more advanced culinary challenges. Designed for students who achieved a B grade or higher in Year 9 Food, this course moves beyond weekly cooking and into bold concepts, intricate dishes, and industry-inspired design projects. It's a chance to explore food in a deeper, more creative way — from flavour development to menu design and high-level kitchen practice. The themes may include one or more of the following:

Embark on a captivating sensory journey with us, where we'll refine your culinary expertise. Throughout this experience, you will delve into planning, crafting, and cooking an enticing array of dishes. Picture breakfast and lunch options, accompanied by delectable breads, cakes, and pastries – all tailored perfectly for a café menu. As you progress, you'll not only elevate your kitchen skills but also learn to operate seamlessly and securely in a collaborative kitchen environment. This includes working harmoniously with your peers. But there's more to explore. Discover the intricacies of constructing a well-rounded menu that covers breakfast, lunch, and a variety of beverages. Additionally, you will have the opportunity to fine-tune the layout of your café space, ensuring it's as inviting as the flavors you'll be offering.

Teenagers love to eat! So, let's learn how to cook great tasting food that's quick to prepare and even (just secretly) better for you than packet and fast food. In this fabulous elective, students have the opportunity to explore a range of different foods and trail new products and learn about what influences their food choices. Students will make tasty recipes suitable for different times of the day (breakfast, lunch, and dinner). Students will explore a range of recipes from around the world such as: Indian Curry, French Crepes, Italian pizza, and burgers. A highlight of the course is getting to participate in TV inspired cooking show challenges e.g., MasterChef Mystery Box. The next time you get hungry instead of reaching for the takeout menu, open your pantry and be creative.

Please note that students enrolled in the Maritime Program will not be able to select this course.

Compulsory Charge: $120.00

TECHNOLOGIES

General Food - Food for Thought (10FST)

Food for Thought is a practical course that equips students with the knowledge and life skills needed to make informed decisions about food, health, and wellbeing. Students explore topics such as nutrition, food security, sustainability, responsible consumer choices, and their impact on individuals, families, and communities.

Through hands-on cooking experiences and real-world learning activities, students develop confidence in food preparation, kitchen safety, meal planning, and healthy living. The course encourages critical and creative thinking while building practical skills that promote independence and self-sufficiency.

Students will create their own personal **"Handbook for Life"**, containing recipes, cooking techniques, budgeting tips, meal-planning ideas, and other useful information to support a healthy and independent lifestyle.

Compulsory Charge: $120.00

Family & Childcare (10CFC)

Year 10 Family and Childcare is a practical and engaging course for students who enjoy supporting others, working with children, and learning how families and communities shape early development. The course introduces students to the world of childcare and early learning, focusing on the skills and knowledge needed to nurture and guide young children during their most important formative years.

Students explore the fundamentals of child development, including cognitive, emotional, and social growth. They learn how to create safe, stimulating, and supportive environments for children through a mix of theory and hands-on experiences. The course also covers early education techniques, communication strategies, and the responsibilities involved in caring for young children. These experiences help students understand how childcare professionals support children's wellbeing, learning, and development.

This course is ideal for students interested in early childhood education, community services, or future careers in childcare, teaching, or family support. It also builds valuable life skills such as empathy, communication, responsibility, and teamwork. Year 10 Family and Childcare provide a strong foundation for Senior School pathways and equips students with practical knowledge they can use both professionally and personally.

Compulsory Charge: $90.00

HEALTH & PHYSICAL EDUCATION

Physical Recreation (10REC)

Year 10 Physical Recreation is a dynamic and challenging Physical Education course designed for students who enjoy being active, developing their skills, and participating in competitive and recreational environments. The program focuses on improving individual performance, strengthening teamwork, and building confidence through a wide range of physical activities.

Students take part in recreational options such as frisbee, vortex, outdoor volleyball, multi sport, specialised fitness training, gym sessions, swimming, hiking and mountain bike riding. They also begin introductory Physical Education Studies theory to support future learning. The course emphasises teamwork, strategy, and safe participation, and students must wear their House shirt at all times, especially during off-site activities.

Physical Recreation is an excellent pathway for students considering Year 11 Physical Education Studies General or the Certificate II in Sport and Recreation. It is ideal for students who enjoy working with others, challenging themselves physically, and building lifelong skills in fitness, teamwork, and personal wellbeing.

Compulsory Charge: $60.00

HASS

Criminal Investigation (10CRIM)

Year 10 Criminal Investigation is an engaging and thought-provoking course for students interested in crime, justice, and the systems that protect communities. The course introduces students to the criminal justice system, forensic science, law enforcement, and criminal psychology, encouraging them to think critically about how crimes are investigated and solved.

Students explore topics such as crime scene investigation, advances in forensic technology, profiling, and criminal case studies. They examine real cases, including local cold cases, allegations of police corruption, and situations where new forensic techniques have exonerated the accused. Through inquiry tasks and assessments, students use ICT to research, analyse evidence, and present findings, developing strong skills in problem-solving and critical thinking.

This course is ideal for students interested in criminology, policing, psychology, law, or forensic science. It builds valuable transferable skills in communication, teamwork, research, and analysis, providing a solid foundation for Senior School pathways and future careers in justice-related fields.

Compulsory Charge: $50.00

Specialist Maritime Program

Maritime Program (10MSP)

This course is compulsory for students enrolled in the Specialist Maritime Program.

The Specialist Maritime Program Elective is designed to complement and enhance students' participation in the broader Maritime Program. Aligned with the Design and Technologies curriculum, the course provides opportunities for students to develop practical skills and knowledge within marine and maritime contexts through hands-on learning experiences and applied projects.

The course also supports the delivery of key components of the Maritime training schedule, providing students with regular opportunities to develop, practise, and master the skills and knowledge required within the Specialist Maritime Program.

Please note that students selecting this pathway will not be able to select the following courses:
Dance, Media Arts or Food Specialty

Compulsory Charge: $40.00

Dear Parents/Guardians,

At Rockingham SHS students in Year 10 study a range of compulsory subjects, including English, Mathematics, Science, Humanities and Social Sciences (HASS), Physical Education, and Health Education. Maritime students will do a

In addition, students can select option subjects that reflect their interests, strengths, and career aspirations. This guide outlines the range of option subjects available in, The Arts, Languages and Technologies Learning Areas for 2027. All Year 10 option courses will run for the full year, allowing students to develop a deeper understanding of their chosen subjects and better prepare for senior secondary studies in Years 11 and 12.

We encourage families to discuss the available options together and carefully consider selections. While every effort will be made to place students into their preferred courses, placements are subject to class availability.

Choosing subjects that align with a student's interests and goals can help make Year 10 a rewarding and successful experience.

- Students **must** select at least one subject from The Arts learning area and at least one subject from Technologies for the year.
- Students in the Maritime Program will also participate in a Maritime option class for two periods per week.
- Subject selections should be made carefully, as changes may not be possible once classes have been formed. We encourage students and families to consider each course's suitability, interests, future pathways, and associated costs before making their final choices.

Selections must be finalised by 16 October 2026. Students who have not submitted their selections by this date will be allocated subjects at the discretion of the school.

Please note: Some option courses have associated compulsory charges. Participation in an extra-cost option is conditional upon payment of a confirmation deposit equal to **50% of the total estimated course cost** payable by 30th October 2026. All subject charges for Year 10 courses should be paid in full by the end of Term 2 2027.

Payment plans are available for all families. Please contact the accounts office on 9527 0300 or email rockingham.shs.accounts@education.wa.edu.au to arrange a payment plan.

THE ARTS

Dance (10DAN)

Year 10 Dance provides students with opportunities to extend their performance, choreographic, and analytical skills through practical and engaging learning experiences. Students participate in technique classes, rehearsals, and collaborative tasks that build confidence, safe dance practices, and performance quality. They refine key elements of dance such as body, space, time, dynamics, and relationships while developing clarity, projection, and precision in their movement.

Students explore a range of dance styles—from contemporary to cultural forms—investigating choreographic intent, stylistic features, and the social, cultural, and historical influences that shape dance. They analyse professional works and apply choreographic devices and structures to create original pieces that communicate meaning and evoke audience response.

This course is ideal for students who enjoy performing, creating choreography, and working collaboratively in a supportive and creative environment. It also provides a strong foundation for students wishing to continue into Year 11 Dance in Senior School.

Please note that students enrolled in the Maritime Program will not be able to select this course.

Compulsory Charge: $64.00

Drama (10DRA)

Year 10 Drama provides students with opportunities to further develop their performance and creative skills through practical, engaging activities. Students participate in both individual and group work, building confidence and extending key dramatic techniques such as voice, movement, improvisation, characterisation, and play building.

As a performance-based subject, students will present work to an audience and learn the importance of collaboration, communication, and teamwork. A strong emphasis is placed on creativity, problem-solving, and working effectively with others.

This course allows students to specialise in areas such as dramatic action, script development, and exploring a range of theatre styles. It is ideal for students who enjoy performing, expressing ideas through drama, and working collaboratively to create interesting and dynamic characters. Drama in Year 10 also provides a strong foundation for students wishing to continue into Year 11 Drama.

Compulsory Charge: $NIL

THE ARTS

Fine Arts (10FAR)

Year 10 Fine Arts focuses on building strong practical skills and confidence as an artist. Students work with a variety of materials and processes, including pencil and ink drawing, dry-point etching, acrylic painting, and mixed-media techniques. They develop ideas that express personal beliefs and values, with a focus on representation and meaning, culminating in a resolved artwork that showcases their creativity and technical development.

Students also explore the work of established artists and art movements, discovering how and why artists create their work. These investigations help inspire students' own art-making and deepen their understanding of artistic intention. Fine Arts provides a solid foundation for students wishing to continue into Year 11 Visual Arts in Senior School.

Compulsory Charge: $80.00

Visual Arts (10VAR)

Year 10 Visual Arts allows students to explore and develop their creativity through a wide range of two-dimensional and three-dimensional art forms. They work with mediums such as drawing, painting, printmaking, sculpture, clay, collage, design, and digital or multimedia processes while building practical skills, creative thinking, and an understanding of the elements and principles of art and design. Students also investigate art history and study artists from different cultures and time periods, learning how to analyse and interpret artworks with confidence.

The course places strong emphasis on developing foundational skills and artistic expression, helping students grow as creative thinkers and makers. It is ideal for students who enjoy experimenting with new ideas and materials, exploring personal meaning in their work, and producing unique and thoughtful artworks. Year 10 Visual Arts also provides an excellent pathway for further study in Visual Arts.

Compulsory Charge: $80.00

THE ARTS

Performing Arts (10PA)

Year 10 Performing Arts introduces students to Dance, Drama, and Musical Theatre through a diverse range of creative and performance-based experiences. Students learn to create, present, and analyse performance work while exploring choreographic processes, dramatic techniques, and musical theatre conventions. The course encourages creativity, risk-taking, collaboration, and confidence, with opportunities to refine ideas and perform for a live audience. Throughout the year, students build transferable skills such as critical and creative thinking, empathy, communication, and teamwork.

This program provides a strong foundation for students wishing to continue into Senior School subjects including Dance, Drama and Music. It is a supportive and engaging course designed to extend performance skills, nurture creativity, and help students feel confident presenting in front of others.

Compulsory Charge: $45.00

Media Arts (10MPA)

Year 10 Media Arts is a practical and creative course for students interested in filmmaking, photography, and visual storytelling. It builds key skills in cinematography, character development, and media production, providing a strong foundation for Year 11 Media Production and Analysis.

Students create a range of media works, including an original short film, trailers, posters, video reviews, and photographic art. They study film as an art form through Auteur Film and Film Noir, exploring directors such as Wes Anderson and Christopher Nolan. Photography is a major focus, with students
using DSLR cameras in manual mode to control aperture and shutter speed. Collaboration is essential, and students are expected to complete some production tasks outside school hours.

By the end of the course, students will have produced a digital photography portfolio, and a collection of media works suitable for showcasing at events such as the YOH Screen Fest. These works support future pathways in Creative Arts, including portfolio entry into courses at ECU, Curtin, and Murdoch University.

Please note that students enrolled in the Maritime Program will not be able to select this course.

Compulsory Charge: $70.00

THE ARTS

Music (10MUS)

Year 10 Music is designed for students of all experience levels, from beginners through to advanced musicians, and is ideal for anyone with a passion for music. The course focuses on practical, hands-on learning using real instruments and real songs, giving students the chance to develop their skills in an engaging and supportive environment.

Students explore the elements of contemporary music while building skills on a range of instruments, including keyboards, guitars, ukuleles, and more. Vocalists also have opportunities to extend their performance abilities. Throughout the course, students learn to emulate the sounds they hear on the radio and use music technology to arrange, record, and produce their own musical ideas.

Compulsory Charge: $30.00

Photography (10PHO)

Year 10 Photography is a practical and engaging course designed for students who want to develop their technical skills, artistic eye, and confidence behind the camera. It introduces students to the creative possibilities of digital photography while encouraging personal expression and visual communication.

Students work with DSLR cameras and digital editing software to explore a range of photographic styles, including macro, portrait, landscape, action, and creative photography. They learn how to use composition, lighting, perspective, and camera settings to produce high-quality images, while developing skills in planning, capturing, editing, and presenting their work. Students also investigate the work of professional photographers, analysing how images influence audiences and how meaning is created through visual choices.

Throughout the course, students build a portfolio of photographic work that reflects their skills, creativity, and personal interests. They may have opportunities to participate in excursions and real-world photographic experiences, helping them apply their learning in authentic contexts. Year 10 Photography provides a strong foundation for future pathways in Visual Arts, Photography, TAFE, and university studies.

Compulsory Charge: $100.00

TECHNOLOGIES

Metalwork (10MTDM)

Metalwork provides students with the opportunity to further develop their practical workshop skills while working with a range of metals, tools, and equipment. Students will learn increasingly advanced fabrication techniques and gain experience in planning, designing, and producing quality metal projects.

Throughout the course, students will develop skills in sheet metal fabrication, metal shaping, and welding processes. They will learn to safely use a variety of workshop equipment, including drill presses, metal benders, cold saws, and oxy-acetylene equipment for heating, bending, and shaping metal. Students will also gain experience in MIG and fusion welding techniques.

By completing a range of practical projects, students will build confidence, accuracy, and problem-solving skills while developing the knowledge and techniques required for more complex metalwork projects. This course is ideal for students interested in engineering, trades, manufacturing, or hands-on learning.

Compulsory Charge: $80.00

Woodwork (10MTDW)

Year 10 Woodwork is a practical and hands-on course for students who enjoy designing, building, and creating high-quality projects. The course focuses on developing confidence and skill in the workshop, allowing students to plan and construct more complex pieces, including small items of furniture. It is ideal for students who enjoy working with tools, solving problems, and bringing their design ideas to life.

Students are introduced to a wider range of power tools, machinery, joinery methods, and fabrication techniques. They learn how to sketch ideas, create working drawings, and prepare procedure plans to ensure their workshop time is productive and purposeful. Occupational Health and Safety is covered comprehensively, helping students understand hazards, work safely, and develop responsible workshop practices.

Throughout the course, students build the competence needed to manufacture substantial projects to a commercial standard. Year 10 Woodwork also provides the essential skills and knowledge required for Year 11 Materials, Design & Technology: Woodwork and Metalwork, supporting students who wish to continue into Senior School pathways.

Compulsory Charge: $50.00

Students will explore a range of recipes from around the world such as: Indian Curry, French Crepes, Italian pizza, and burgers. A highlight of the course is getting to participate in TV inspired cooking show challenges e.g., MasterChef Mystery Box. The next time you get hungry instead of reaching for the takeout menu, open your pantry and be creative.

Please note that students enrolled in the Maritime Program will not be able to select this course.

Compulsory Charge: $120.00

TECHNOLOGIES

General Food - Food for Thought (10FST)

Food for Thought is a practical course that equips students with the knowledge and life skills needed to make informed decisions about food, health, and wellbeing. Students explore topics such as nutrition, food security, sustainability, responsible consumer choices, and their impact on individuals, families, and communities.

Through hands-on cooking experiences and real-world learning activities, students develop confidence in food preparation, kitchen safety, meal planning, and healthy living. The course encourages critical and creative thinking while building practical skills that promote independence and self-sufficiency.

Students will create their own personal **"Handbook for Life"**, containing recipes, cooking techniques, budgeting tips, meal-planning ideas, and other useful information to support a healthy and independent lifestyle.

Compulsory Charge: $120.00

Family & Childcare (10CFC)

Year 10 Family and Childcare is a practical and engaging course for students who enjoy supporting others, working with children, and learning how families and communities shape early development. The course introduces students to the world of childcare and early learning, focusing on the skills and knowledge needed to nurture and guide young children during their most important formative years.

Students explore the fundamentals of child development, including cognitive, emotional, and social growth. They learn how to create safe, stimulating, and supportive environments for children through a mix of theory and hands-on experiences. The course also covers early education techniques, communication strategies, and the responsibilities involved in caring for young children. These experiences help students understand how childcare professionals support children's wellbeing, learning, and development.

This course is ideal for students interested in early childhood education, community services, or future careers in childcare, teaching, or family support. It also builds valuable life skills such as empathy, communication, responsibility, and teamwork. Year 10 Family and Childcare provide a strong foundation for Senior School pathways and equips students with practical knowledge they can use both professionally and personally.

Compulsory Charge: $90.00

HEALTH & PHYSICAL EDUCATION

Physical Recreation (10REC)

Year 10 Physical Recreation is a dynamic and challenging Physical Education course designed for students who enjoy being active, developing their skills, and participating in competitive and recreational environments. The program focuses on improving individual performance, strengthening teamwork, and building confidence through a wide range of physical activities.

Students take part in recreational options such as frisbee, vortex, outdoor volleyball, multi sport, specialised fitness training, gym sessions, swimming, hiking and mountain bike riding. They also begin introductory Physical Education Studies theory to support future learning. The course emphasises teamwork, strategy, and safe participation, and students must wear their House shirt at all times, especially during off-site activities.

Physical Recreation is an excellent pathway for students considering Year 11 Physical Education Studies General or the Certificate II in Sport and Recreation. It is ideal for students who enjoy working with others, challenging themselves physically, and building lifelong skills in fitness, teamwork, and personal wellbeing.

Compulsory Charge: $60.00

HASS

Criminal Investigation (10CRIM)

Year 10 Criminal Investigation is an engaging and thought-provoking course for students interested in crime, justice, and the systems that protect communities. The course introduces students to the criminal justice system, forensic science, law enforcement, and criminal psychology, encouraging them to think critically about how crimes are investigated and solved.

Students explore topics such as crime scene investigation, advances in forensic technology, profiling, and criminal case studies. They examine real cases, including local cold cases, allegations of police corruption, and situations where new forensic techniques have exonerated the accused. Through inquiry tasks and assessments, students use ICT to research, analyse evidence, and present findings, developing strong skills in problem-solving and critical thinking.

This course is ideal for students interested in criminology, policing, psychology, law, or forensic science. It builds valuable transferable skills in communication, teamwork, research, and analysis, providing a solid foundation for Senior School pathways and future careers in justice-related fields.

Compulsory Charge: $50.00

Specialist Maritime Program

Maritime Program (10MSP)

This course is compulsory for students enrolled in the Specialist Maritime Program.

The Specialist Maritime Program Elective is designed to complement and enhance students' participation in the broader Maritime Program. Aligned with the Design and Technologies curriculum, the course provides opportunities for students to develop practical skills and knowledge within marine and maritime contexts through hands-on learning experiences and applied projects.

The course also supports the delivery of key components of the Maritime training schedule, providing students with regular opportunities to develop, practise, and master the skills and knowledge required within the Specialist Maritime Program.

Please note that students selecting this pathway will not be able to select the following courses:
Dance, Media Arts or Food Specialty

Compulsory Charge: $40.00

Dear Parents/Guardians,

At Rockingham SHS students in Year 10 study a range of compulsory subjects, including English, Mathematics, Science, Humanities and Social Sciences (HASS), Physical Education, and Health Education. Maritime students will do a

In addition, students can select option subjects that reflect their interests, strengths, and career aspirations. This guide outlines the range of option subjects available in, The Arts, Languages and Technologies Learning Areas for 2027. All Year 10 option courses will run for the full year, allowing students to develop a deeper understanding of their chosen subjects and better prepare for senior secondary studies in Years 11 and 12.

We encourage families to discuss the available options together and carefully consider selections. While every effort will be made to place students into their preferred courses, placements are subject to class availability.

Choosing subjects that align with a student's interests and goals can help make Year 10 a rewarding and successful experience.

- Students **must** select at least one subject from The Arts learning area and at least one subject from Technologies for the year.
- Students in the Maritime Program will also participate in a Maritime option class for two periods per week.
- Subject selections should be made carefully, as changes may not be possible once classes have been formed. We encourage students and families to consider each course's suitability, interests, future pathways, and associated costs before making their final choices.

Selections must be finalised by 16 October 2026. Students who have not submitted their selections by this date will be allocated subjects at the discretion of the school.

Please note: Some option courses have associated compulsory charges. Participation in an extra-cost option is conditional upon payment of a confirmation deposit equal to **50% of the total estimated course cost** payable by 30th October 2026. All subject charges for Year 10 courses should be paid in full by the end of Term 2 2027.

Payment plans are available for all families. Please contact the accounts office on 9527 0300 or email rockingham.shs.accounts@education.wa.edu.au to arrange a payment plan.

THE ARTS

Dance (10DAN)

Year 10 Dance provides students with opportunities to extend their performance, choreographic, and analytical skills through practical and engaging learning experiences. Students participate in technique classes, rehearsals, and collaborative tasks that build confidence, safe dance practices, and performance quality. They refine key elements of dance such as body, space, time, dynamics, and relationships while developing clarity, projection, and precision in their movement.

Students explore a range of dance styles—from contemporary to cultural forms—investigating choreographic intent, stylistic features, and the social, cultural, and historical influences that shape dance. They analyse professional works and apply choreographic devices and structures to create original pieces that communicate meaning and evoke audience response.

This course is ideal for students who enjoy performing, creating choreography, and working collaboratively in a supportive and creative environment. It also provides a strong foundation for students wishing to continue into Year 11 Dance in Senior School.

Please note that students enrolled in the Maritime Program will not be able to select this course.

Compulsory Charge: $64.00

Drama (10DRA)

Year 10 Drama provides students with opportunities to further develop their performance and creative skills through practical, engaging activities. Students participate in both individual and group work, building confidence and extending key dramatic techniques such as voice, movement, improvisation, characterisation, and play building.

As a performance-based subject, students will present work to an audience and learn the importance of collaboration, communication, and teamwork. A strong emphasis is placed on creativity, problem-solving, and working effectively with others.

This course allows students to specialise in areas such as dramatic action, script development, and exploring a range of theatre styles. It is ideal for students who enjoy performing, expressing ideas through drama, and working collaboratively to create interesting and dynamic characters. Drama in Year 10 also provides a strong foundation for students wishing to continue into Year 11 Drama.

Compulsory Charge: $NIL

THE ARTS

Fine Arts (10FAR)

Year 10 Fine Arts focuses on building strong practical skills and confidence as an artist. Students work with a variety of materials and processes, including pencil and ink drawing, dry-point etching, acrylic painting, and mixed-media techniques. They develop ideas that express personal beliefs and values, with a focus on representation and meaning, culminating in a resolved artwork that showcases their creativity and technical development.

Students also explore the work of established artists and art movements, discovering how and why artists create their work. These investigations help inspire students' own art-making and deepen their understanding of artistic intention. Fine Arts provides a solid foundation for students wishing to continue into Year 11 Visual Arts in Senior School.

Compulsory Charge: $80.00

Visual Arts (10VAR)

Year 10 Visual Arts allows students to explore and develop their creativity through a wide range of two-dimensional and three-dimensional art forms. They work with mediums such as drawing, painting, printmaking, sculpture, clay, collage, design, and digital or multimedia processes while building practical skills, creative thinking, and an understanding of the elements and principles of art and design. Students also investigate art history and study artists from different cultures and time periods, learning how to analyse and interpret artworks with confidence.

The course places strong emphasis on developing foundational skills and artistic expression, helping students grow as creative thinkers and makers. It is ideal for students who enjoy experimenting with new ideas and materials, exploring personal meaning in their work, and producing unique and thoughtful artworks. Year 10 Visual Arts also provides an excellent pathway for further study in Visual Arts.

Compulsory Charge: $80.00

THE ARTS

Performing Arts (10PA)

Year 10 Performing Arts introduces students to Dance, Drama, and Musical Theatre through a diverse range of creative and performance-based experiences. Students learn to create, present, and analyse performance work while exploring choreographic processes, dramatic techniques, and musical theatre conventions. The course encourages creativity, risk-taking, collaboration, and confidence, with opportunities to refine ideas and perform for a live audience. Throughout the year, students build transferable skills such as critical and creative thinking, empathy, communication, and teamwork.

This program provides a strong foundation for students wishing to continue into Senior School subjects including Dance, Drama and Music. It is a supportive and engaging course designed to extend performance skills, nurture creativity, and help students feel confident presenting in front of others.

Compulsory Charge: $45.00

Media Arts (10MPA)

Year 10 Media Arts is a practical and creative course for students interested in filmmaking, photography, and visual storytelling. It builds key skills in cinematography, character development, and media production, providing a strong foundation for Year 11 Media Production and Analysis.

Students create a range of media works, including an original short film, trailers, posters, video reviews, and photographic art. They study film as an art form through Auteur Film and Film Noir, exploring directors such as Wes Anderson and Christopher Nolan. Photography is a major focus, with students
using DSLR cameras in manual mode to control aperture and shutter speed. Collaboration is essential, and students are expected to complete some production tasks outside school hours.

By the end of the course, students will have produced a digital photography portfolio, and a collection of media works suitable for showcasing at events such as the YOH Screen Fest. These works support future pathways in Creative Arts, including portfolio entry into courses at ECU, Curtin, and Murdoch University.

Please note that students enrolled in the Maritime Program will not be able to select this course.

Compulsory Charge: $70.00

THE ARTS

Music (10MUS)

Year 10 Music is designed for students of all experience levels, from beginners through to advanced musicians, and is ideal for anyone with a passion for music. The course focuses on practical, hands-on learning using real instruments and real songs, giving students the chance to develop their skills in an engaging and supportive environment.

Students explore the elements of contemporary music while building skills on a range of instruments, including keyboards, guitars, ukuleles, and more. Vocalists also have opportunities to extend their performance abilities. Throughout the course, students learn to emulate the sounds they hear on the radio and use music technology to arrange, record, and produce their own musical ideas.

Compulsory Charge: $30.00

Photography (10PHO)

Year 10 Photography is a practical and engaging course designed for students who want to develop their technical skills, artistic eye, and confidence behind the camera. It introduces students to the creative possibilities of digital photography while encouraging personal expression and visual communication.

Students work with DSLR cameras and digital editing software to explore a range of photographic styles, including macro, portrait, landscape, action, and creative photography. They learn how to use composition, lighting, perspective, and camera settings to produce high-quality images, while developing skills in planning, capturing, editing, and presenting their work. Students also investigate the work of professional photographers, analysing how images influence audiences and how meaning is created through visual choices.

Throughout the course, students build a portfolio of photographic work that reflects their skills, creativity, and personal interests. They may have opportunities to participate in excursions and real-world photographic experiences, helping them apply their learning in authentic contexts. Year 10 Photography provides a strong foundation for future pathways in Visual Arts, Photography, TAFE, and university studies.

Compulsory Charge: $100.00

TECHNOLOGIES

Metalwork (10MTDM)

Metalwork provides students with the opportunity to further develop their practical workshop skills while working with a range of metals, tools, and equipment. Students will learn increasingly advanced fabrication techniques and gain experience in planning, designing, and producing quality metal projects.

Throughout the course, students will develop skills in sheet metal fabrication, metal shaping, and welding processes. They will learn to safely use a variety of workshop equipment, including drill presses, metal benders, cold saws, and oxy-acetylene equipment for heating, bending, and shaping metal. Students will also gain experience in MIG and fusion welding techniques.

By completing a range of practical projects, students will build confidence, accuracy, and problem-solving skills while developing the knowledge and techniques required for more complex metalwork projects. This course is ideal for students interested in engineering, trades, manufacturing, or hands-on learning.

Compulsory Charge: $80.00

Woodwork (10MTDW)

Year 10 Woodwork is a practical and hands-on course for students who enjoy designing, building, and creating high-quality projects. The course focuses on developing confidence and skill in the workshop, allowing students to plan and construct more complex pieces, including small items of furniture. It is ideal for students who enjoy working with tools, solving problems, and bringing their design ideas to life.

Students are introduced to a wider range of power tools, machinery, joinery methods, and fabrication techniques. They learn how to sketch ideas, create working drawings, and prepare procedure plans to ensure their workshop time is productive and purposeful. Occupational Health and Safety is covered comprehensively, helping students understand hazards, work safely, and develop responsible workshop practices.

Throughout the course, students build the competence needed to manufacture substantial projects to a commercial standard. Year 10 Woodwork also provides the essential skills and knowledge required for Year 11 Materials, Design & Technology: Woodwork and Metalwork, supporting students who wish to continue into Senior School pathways.

Compulsory Charge: $50.00

TECHNOLOGIES

Engineering (10ENDT)

Year 10 Engineering is a hands-on, project-based course that encourages students to become creative problem-solvers and innovative thinkers. Students apply engineering principles and systems thinking to design, build, and test practical solutions to real-world challenges, exploring how materials, structures, and physical forces interact to create efficient and purposeful outcomes.

Throughout the course, students work on major projects such as designing and constructing a Marble Run Machine that demonstrates mechanical systems and energy transfer, and developing a Solar Tracker/Charger that applies renewable energy principles. They plan, develop, test, and refine their designs using an iterative process, while considering important factors such as time, cost, risk, sustainability, and functionality. Collaboration is a key component, with students working in teams to complete production tasks and solve engineering problems.

By engaging in research, planning, prototyping, and evaluation, students build valuable skills in critical thinking, teamwork, communication, and project management. Year 10 Engineering provides a strong foundation for future pathways in engineering, technology, robotics, and STEM-related careers, preparing students for Senior School study and real-world applications.

Compulsory Charge: $155.00

Digital Technologies (10DIGI)

Digital Technologies is an exciting and practical course that introduces students to the world of programming, game development, robotics, and digital design. Students will explore how technology is used to solve problems, create innovative products, and shape the modern world.

Throughout the course, students will develop skills in coding, computer game design, graphic design, and 3D modelling. They will have opportunities to design and create 3D printed products, develop computer games, and work with robotics by programming, controlling, and testing robotic systems. Students will also investigate emerging technologies and explore potential pathways in STEM-related industries and careers.

Students will work both independently and collaboratively to research, design, create, and evaluate a range of digital projects. By applying the Technology Process, they will develop valuable 21st-century skills, including creativity, critical thinking, problem-solving, communication, and teamwork, while producing innovative digital solutions.

Compulsory Charge: $NIL

TECHNOLOGIES

Food Specialty (10FSP)

Year 10 Food Specialty is for motivated young food creators ready to elevate their skills and tackle more advanced culinary challenges. Designed for students who achieved a B grade or higher in Year 9 Food, this course moves beyond weekly cooking and into bold concepts, intricate dishes, and industry-inspired design projects. It's a chance to explore food in a deeper, more creative way — from flavour development to menu design and high-level kitchen practice. The themes may include one or more of the following:

Embark on a captivating sensory journey with us, where we'll refine your culinary expertise. Throughout this experience, you will delve into planning, crafting, and cooking an enticing array of dishes. Picture breakfast and lunch options, accompanied by delectable breads, cakes, and pastries – all tailored perfectly for a café menu. As you progress, you'll not only elevate your kitchen skills but also learn to operate seamlessly and securely in a collaborative kitchen environment. This includes working harmoniously with your peers. But there's more to explore. Discover the intricacies of constructing a well-rounded menu that covers breakfast, lunch, and a variety of beverages. Additionally, you will have the opportunity to fine-tune the layout of your café space, ensuring it's as inviting as the flavors you'll be offering.

Teenagers love to eat! So, let's learn how to cook great tasting food that's quick to prepare and even (just secretly) better for you than packet and fast food. In this fabulous elective, students have the opportunity to explore a range of different foods and trail new products and learn about what influences their food choices. Students will make tasty recipes suitable for different times of the day (breakfast, lunch, and dinner). Students will explore a range of recipes from around the world such as: Indian Curry, French Crepes, Italian pizza, and burgers. A highlight of the course is getting to participate in TV inspired cooking show challenges e.g., MasterChef Mystery Box. The next time you get hungry instead of reaching for the takeout menu, open your pantry and be creative.

Please note that students enrolled in the Maritime Program will not be able to select this course.

Compulsory Charge: $120.00

TECHNOLOGIES

General Food - Food for Thought (10FST)

Food for Thought is a practical course that equips students with the knowledge and life skills needed to make informed decisions about food, health, and wellbeing. Students explore topics such as nutrition, food security, sustainability, responsible consumer choices, and their impact on individuals, families, and communities.

Through hands-on cooking experiences and real-world learning activities, students develop confidence in food preparation, kitchen safety, meal planning, and healthy living. The course encourages critical and creative thinking while building practical skills that promote independence and self-sufficiency.

Students will create their own personal **"Handbook for Life"**, containing recipes, cooking techniques, budgeting tips, meal-planning ideas, and other useful information to support a healthy and independent lifestyle.

Compulsory Charge: $120.00

Family & Childcare (10CFC)

Year 10 Family and Childcare is a practical and engaging course for students who enjoy supporting others, working with children, and learning how families and communities shape early development. The course introduces students to the world of childcare and early learning, focusing on the skills and knowledge needed to nurture and guide young children during their most important formative years.

Students explore the fundamentals of child development, including cognitive, emotional, and social growth. They learn how to create safe, stimulating, and supportive environments for children through a mix of theory and hands-on experiences. The course also covers early education techniques, communication strategies, and the responsibilities involved in caring for young children. These experiences help students understand how childcare professionals support children's wellbeing, learning, and development.

This course is ideal for students interested in early childhood education, community services, or future careers in childcare, teaching, or family support. It also builds valuable life skills such as empathy, communication, responsibility, and teamwork. Year 10 Family and Childcare provide a strong foundation for Senior School pathways and equips students with practical knowledge they can use both professionally and personally.

Compulsory Charge: $90.00

HEALTH & PHYSICAL EDUCATION

Physical Recreation (10REC)

Year 10 Physical Recreation is a dynamic and challenging Physical Education course designed for students who enjoy being active, developing their skills, and participating in competitive and recreational environments. The program focuses on improving individual performance, strengthening teamwork, and building confidence through a wide range of physical activities.

Students take part in recreational options such as frisbee, vortex, outdoor volleyball, multi-sport, specialised fitness training, gym sessions, swimming, hiking and mountain bike riding. They also begin introductory Physical Education Studies theory to support future learning. The course emphasises teamwork, strategy, and safe participation, and students must wear their House shirt at all times, especially during off-site activities.

Physical Recreation is an excellent pathway for students considering Year 11 Physical Education Studies General or the Certificate II in Sport and Recreation. It is ideal for students who enjoy working with others, challenging themselves physically, and building lifelong skills in fitness, teamwork, and personal wellbeing.

Compulsory Charge: $60.00
